

# Free, easy interactive learning

Join our free online academy and learn to master collaborative robots today

## Become a cobot programmer in 6 basic modules

We have developed online training modules to further lower the automation barrier. The hands-on modules are offered free of charge, open to all, and built to deliver hands-on learning via interactive simulations to maximize user engagement. Sign up to the Universal Robots Academy and get the introduction necessary to master basic programming skills.

### Basic modules

**Module 1**  
Features and terminology  
9 min

**Module 2**  
How the robot works  
10 min

**Module 3**  
Setting up a tool  
22 min

**Module 4**  
Creating a program  
24 min

**Module 5**  
Interaction with external devices  
13 min

**Module 6**  
Safety settings  
9 min

### Learn more with extra modules

**Module 7**  
Feature Coordinates  
13 min

**Module 8**  
Packaging  
13 min

**Module 9**  
Program flow  
15 min
